

MamNexa AI - Pre-Analysis Research Report

Case ID: demo-0001 Generated (UTC): 2026-08-24T12:00:00+00:00

Research decision-support output only. This is NOT a diagnosis and does not confirm or rule out cancer. All findings
Require Professional Review.

Model Assessment

Model Malignancy Suspicion Index: 0.8123

Assessment: AI-Identified Suspicious Area

Recommendation: Requires Professional Review

Segmented AI-Identified Suspicious Areas: 2

Visual Explanation

Preprocessed input (PHI-removed)

Grad-CAM attention (model focus)

Numbered AI-Identified Suspicious Areas

Heatmap and outlines indicate regions the model attended to / segmented. They are explanatory aids, not clinical findings.

Segmented Regions

Region	Label	Area (px)	Centroid (x, y)	BBox (x,y,w,h)
#1	AI-Identified Suspicious Area #1	842.5	(96, 110)	70, 80, 55, 60
#2	AI-Identified Suspicious Area #2	133.0	(150, 60)	140, 50, 25, 22
